Experience

General Assembly

January 2014- Present

Web development immersive program learning modern languages to develop skillsets for a full stack/generalist developer. We developed three projects during the course of the program, two individual projects and one team oriented project for teaching the workflow for team environments.

Ed Wong Real Estate Co.

May 2012 - September 2013

Real estate agent license mainly working on property management commercial and residential. Property management required a lot of excel work in microsoft with organization of projects and income. Commercial management was on site walk throughs with clients interested in the listing taking photos and using lightroom for rendering images.

Sutterville Forth R

October 2009 - November 2013

Recreational aid and development, working with elementary school children from age 5-12. Staff would have to coordinate very carefully with one another dealing with certain children with special care. Average days would be around 80-130 children, with over 20 of them assigned to different staff with needs. We develop skillsets that either the parents would like to teach them or coordinate with the teachers specific things they need to know.

Education

General Assembly, San Francisco

December 2013 - March 2014

Web Development Immersive

Consumes River College, Sacramento

2006-2010
